DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- A. Claim 1 is functional in form without definitely claiming structure which applicant regards as invention. The cooperation of the recited elements, i.e., heat sink, base, closed mini pipeline, is not being recited to achieve the affect of "waste heat" or "waste heat cooling". Further, the recitation of "with some machine elements causing waste heat" (line 3), and "some machine elements causing waste heat cooling" (line 7) is so broad as to be meaningless in intended meaning. The following terms lack proper antecedence within the claim, "the base" (line 1), "the structure of the closed mini pipeline" (lines 1-2).

A-I are cited as references of specific relevance to Applicant's disclosure. It is note the concept of waste heat in closed heat transfer systems is inherent to all state changes as being an inherent product of the change.
